

Collect — and Protect — Hazardous Waste with Triple Layer, Reinforced Liners, Covers and Bags from THOR

Don't fool around with your waste clean up and outdoor storage. Use heavy duty, reinforced liners, covers and bags for more safety, more re-usability . . . more peace of mind.

THOR offers a complete line of tarpaulins and covers for any part of the hazardous material cycle. Put a liner under contaminated soil, cover over individual or quartets of standard drums — or over entire landfill sites.

Ordinary 4 mil poly sheeting won't stand up to the rigors of constant outdoor exposure. The sun and wind will break down the single layer in no time, *if you don't rip the cover when installing it in the first place.*

The answer is our reinforced DuraShield™ or ThoroShield™ tarps.

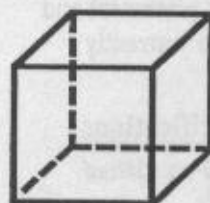

Read on for details.

Drum Head Covers

- Rugged covers protect open drums against dust and other contamination
- Eliminate drum corrosion and leakage from covers rusting through
- UV inhibitors mean our covers last many times longer even in constant sunlight
- Available with elastic or drawstring

Drum Liners

- Eliminate drum corrosion and leakage from the inside
- Eliminate costly drum cleaning and product waste
- Reinforced liner will hold even the heaviest of product
- Withstand temperatures down to -40°F

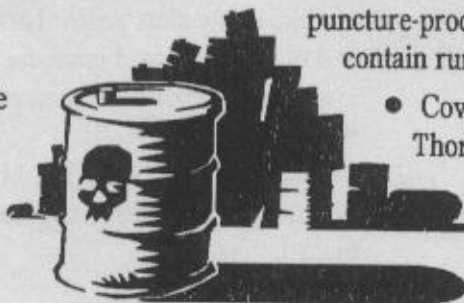

Five-sided Pallet Covers

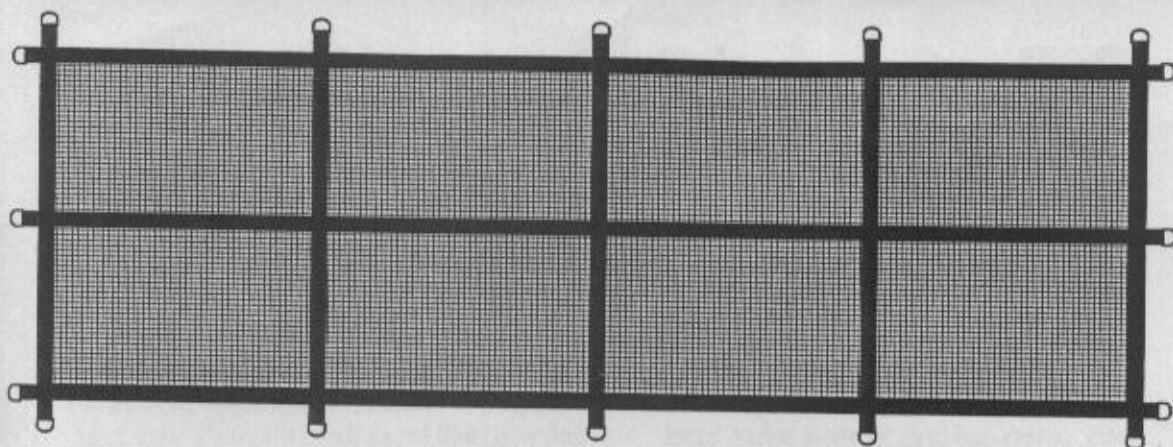

- Finished five-sided pallet covers perfectly sized for four 55 gallon drums
- Rugged material perfect for long term outdoor storage even in the worst of climates
- Hemmed and grommeted
- Creates a positive, clean, safe image of your company in the public's eye
- Available in a range of colors including environmentally friendly green

Soil Remediation Site Covers and Pad Liners

Contaminated soil needs to be cleaned up, but not until after the construction project is completed. In the meantime, you need to keep all contaminants from leaching into the soil at the storage site.

- ThoroShield 850 is practically puncture-proof, so as a liner it will contain runoff and leachates
- Covers of DuraShield or ThoroShield will withstand years of wind and rain, far longer than ordinary polyethylene sheeting

THOR Tough Alternative Daily Covers for Landfills

Increase tipping revenues while preserving the environmental safety and usable life of every household landfill by covering the active areas with an alternative daily cover made from strong, lightweight DuraShield 12000 from THOR.

DuraShield™ 12000 Features

- ❑ Lightweight yet incredibly strong; stands up to ice and snow
- ❑ Rugged, woven reinforced polyethylene
- ❑ UV resistant, chemically inert
- ❑ Reinforcing webbing sewn into tarp edges and in a checkerboard pattern across the face. (Optional for webbing on both the top and underside of the ADC.)
- ❑ "D" rings at all corners and every 12' along both length and width
- ❑ Available in any custom size
- ❑ Rot and mildew proof because DS12000 is 100% synthetic

- ❑ Legally acceptable and environmentally responsible way to maximize tipping revenues
- ❑ Prevent rainwater runoff from leaching toxins into nearby groundwater by guiding liquids away from the landfill in the first place
- ❑ Save up to 25% of landfill space compared with using soil as a cover and avoid the cost of purchased backfill materials, equipment, wear & tear and labor costs
- ❑ Contain odors and keep out animals, insects and other carriers of disease; reduce soil erosion and control water runoff flow
- ❑ Economical —cover can be used again and again. Far superior to lighter weight materials and nonwoven fabrics
- ❑ Reduce labor costs with faster placement and removal than any other system currently approved

DuraShield 12000 Specifications

- | | |
|-------------------|----------------------------------|
| ❑ Standard Weight | 10 oz/yd ² or 70#/msf |
| ❑ Thickness | 17.2 mils |
| ❑ Tear Strength | 440 lbs |
| ❑ Impact Strength | 610 psi |

Keep Traffic Out of Hazardous Areas with THOR Barricade Tape

Barricade spill sites and other hazardous areas with a highly visible, safety alert yellow barricade tape perimeter.

- Available standard grade for short term use and reinforced for longer term protection
- Giant 3" x 1000' rolls
- CAUTION HAZARDOUS MATERIAL along with dozens of other messages printed with 2" tall bold, black letters
